

The Monel methodÁ

Manual Forbo floor care, using basic floor care tools

The Monel method (or 'soap film method') is the best option when a rotary machine is not available or not practical. A water-soluble Monel film prevents stubborn dirt from adhering to the flooring surface. Monel provides a satin gloss and an improved slip resistance.

After installation

- . Clean the floor with **Monel** and a mop
- . Pick up dirty water with a wiper and mop or a water vac
- . Rinse with clean water and a mop
- . Apply a fresh **Monel** film with a clean mop
- . Allow the floor to dry

250 ml
Forbo Monel- 10
l water

500 ml **Forbo Monel-** 10 l water

Regular cleaning

- . Wipe with a dust mop and dust cloth, or vacuum the floor
- . Remove spots with a damp mop

Periodic cleaning

- . Clean with **Monel** and a mop
- . Pick up dirty water with a wiper and mop or a water vac
- . Apply a fresh **Monel** film with a clean mop
- . Allow the floor to dry

250 ml
Forbo Monel- 10
l water

500 ml **Forbo Monel-** 10 l water

Occasional maintenance

- . Scrub with **Monel** and a scrub brush
- . Pick up dirty water with a wiper and a mop or a water vac
- . Rinse with clean water and a mop

250 ml
Forbo Monel- 10
l water

- . Apply a fresh **Monel** film with a clean mop
- . Allow the floor to dry

500 ml **Forbo Monel-** 10 l water
