PRO 3000R

1600-0445

ANSMANN PRO 3000R

■ Rechargeable professional torch

The high-performance Pro 3000R torch has been specially designed for demanding users and is the first choice for police, security services, fire-fighters, rescue services and outdoor sports enthusiasts. The energy-saving and highly efficient LEDs provide enormous brightness and lighting range. Powerful luminous flux of up to 3.200 lumens as well as a light range of 213 m speak for itself!

■ Tactical functions - the optimum light for your requirements

The Pro 3000R can be perfectly adjusted to your needs. The light is equipped with 6 light functions. In addition to the three light levels (high/medium/low), the light also has boost, SOS and strobe modes. The intelligent control is another practical feature. The Pro 3000R remembers the last mode that was switched, adapting to your needs - this is indispensable for missions in the dark.

■ Charge and go

High lighting power needs plenty of electrical power. This is provided by the rechargeable 26650 lithium battery, which supplies the high-performance torch with energy. As a rechargeable battery specialist we know what is required in a good rechargeable battery. The integrated ANSMANN safety electronics are particularly important with this enormous energy potential.

If the battery is empty, it can be easily and conveniently recharged via any USB source as a USB Type C charging socket is integrated in the battery and the charging control is carried out via the battery pack. This saves you the expense of single-use batteries and protects the environment. You can find suitable USB mains adapters in the ANSMANN product range. With the common type-C connection, you are completely free, regardless of whether you are at home on the road. A suitable charge cable is included.

■ Robust aluminium housing

The torch has a non-slip and robust housing made from high-strength, hard anodized aluminium. It is extremely resistant to scratching, abrasion and corrosion enabling the torch to be used in the most adverse conditions. Thanks to the IP67 protection, the Pro 3000R is even protected against brief submersion. The torch is also ideally suited for use with one hand or when wearing gloves.

■ Included in delivery

torch, rechargeable battery pack, USB Type-C cable, wrist strap, Holster, operating instruction

PRO 3000R flashlight with new packaging concept

- New packaging concept with the same width as the ANSMANN chargers and batteries
- 100% carton packaging!

Highlights

The PRO 3000R comes with a wide range of accessories and a 5-year warranty.

In boost mode, a luminous flux of up to 3200 lumens and a light range of up to 213m can be achieved.

The light remembers the last mode and thus offers a great advantage for the professional use.

For demanding users

The high-performance flashlight impresses with a handy and robust housing made of high-strength, hard-anodized aluminum.

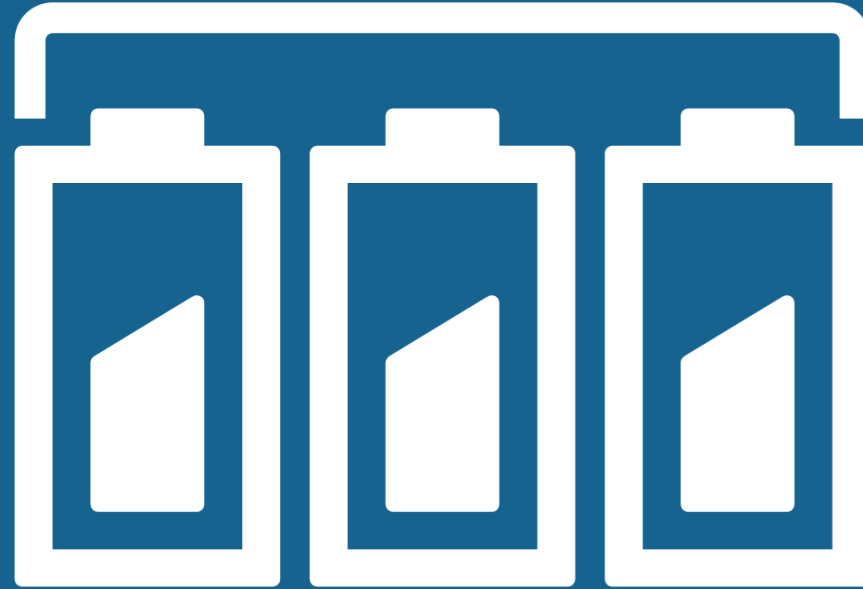

The bezel also allows to break a window in an emergency case.

Due to IP67, the luminaire is also protected for brief immersion in water.

ANSMANN – Top quality at attractive prices

Heavy advertising to the marketplace costs a lot of money, which we prefer to invest in TOP quality for the end user and offer them an optimal price to performance ratio.

Our goal: constant and sustainable brand awareness whilst offering a permanent guarantee for high quality and excellent service.

MANY THANKS
