DIGITAL TIMESWITCH

ECOSAVERS

EcoSavers®
Digital TimeSwitch

The EcoSavers® Digital TimeSwitch is an advanced timer with LCD-display.

This product can help you save energy by setting a timeframe where the connected device will only get power and function for a set time.

Use this device for example in combination with your lighting, wifi router (switch off at night), computer etc.

Besides energy saving, this product is also a convenient product. Activate light for example when you are on holiday, to help prevent burglary.
