# EcoSavers®

## ShowerTimer Hourglass

Melting North Pole – 5 minutes

Another nice invention from EcoSavers, a shower timer hourglass that makes visible what our behavior does to the planet.

This shower timer has a duration of 5 minutes (+/- 10%) and during this time you can see how the North Pole 'melts' as the white ice disappears.

This EcoSavers gimmick contributes to raising awareness to take shorter showers to save energy and reduce the CO2 footprint.

Saving energy is easy with EcoSavers!

Made of transparent plastic:

Size: 95 x 30mm (including suction cup)  
Weight: 76 grams  
Worldwide IP protected
